## Innovative Platform, State of the Art Technology

### Traditional Ultrasound Platform — Image data processing platform

### Innovative RF Ultrasound Platform

### RF signal data processing platform for better resolution and definition

- √ Bigger data to compute for better image quality.
- √ Non-linear demodulation to strong signal.
- √ More accurate and higher step calculation.

- √ Processing algorithm based on signal data, not image data.
- √ Flexible algorithm on data processing.

### VTissue

With RF data, sound speed automatically match with certain tissue in order to be enhanced, such as calculus.

### VFusion

Compounding technology combined together with RF platform, VFusion helps improve the image information, enhance contrast resolution and reduce the noises.

### VSpeckle

Thanks to Vinno RF platform, VSpeckle can adaptively enhances contrast and reduces speckle, haze and other artifacts.
